BİL 102 – Computer Programming
HW 00
Last Submission Date: Feb. 27, 2012 – 13:00

Write a program which calculates the perimeter and the area of a rectangular. Your code will take the edges of the rectangular from the user (**and nothing more**) and outputs the perimeter and the area.

General:

1. Obey honor code principles.
2. Obey coding convention.
3. Your submission should include the following file:

    HW01_<student number>.c

4. Deliver the printout of your code until 3 days later then the last submission date.
